PROFILE

Backend Software Developer specializing in Java and Spring Boot, with experience designing and developing scalable system solutions, REST APIs, and modern web applications with a strong focus on security, quality, and long term maintainability.

Experienced throughout the entire software development lifecycle, from requirements analysis and system design to implementation, testing, and deployment. Skilled in frontend development with React, as well as developing cloud based and containerized solutions using modern development practices.

Motivated by solving complex technical challenges and collaborating with others to build reliable, scalable, and user friendly software solutions.

EXPERIENCES

Excetra
Software Developer

Stockholm, Sweden
2025 - Present

- Develop backend services using Java and Spring Boot.
- Design and implement REST APIs and business logic.
- Develop frontend applications using React.
